

eCuore for Life

technology as solution for real life problems

what is for?

eCuore team is animated to put **Artificial Intelligence@work**, along with virtualization & private cloud, in help of humans & heart disease medicine, with a simple and genial idea to help people with CVDs (CardioVascular Diseases), using technology advancement. **eCUORE** team puts a mix of highly innovative skills to improve the rules of diagnostics and monitoring in Cardiology worldwide. **eCuore** is a breakthrough solution, based on Artificial Intelligence algorithms & cloud technologies, for detecting cardiovascular disorders in Real Time from patients, which will be able to send accurate alerts to emergency services and save lives.

(general description)

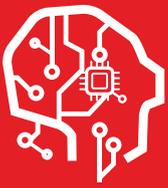

Artificial Intelligence can become your partner for a more agile, secure, flexible approach of your business, as well as for your life.

We put our heart & intelligence in the world's future e-Health by developing & promoting the eCuore technology to help humans with cardiological problems to be monitored with AI & Cloud-based technology & saved from heart failures.

Imagine what we can do together if we put AI@work for your business and interests.
