business continuity planner

RA, CRA, BIA, DRP, DR

what is for?

(general description)

Business Continuity Planner solution offers complete coverage for C-level consultancy around business continuity requirements.

Our consultancy service aims at creating systems of prevention and recovery to deal with potential threats to a company.

We can support your **business continuity intiatives** with:

- BIA (Business Impact Analysis) - identify critical organization functions and activities; identify and define RPOs, RTOs, define recovery requirements for each of the critical functions
- Threat and Risk Analysis
- Current Recoverability Capabilities Assessment
- Impact Analysis
- Solution Design for disaster recovery (DR)
- Implementation of IT related solutions
- Testing DR solutions and coordintation for various drill-type excercises.
