data life saviour

*back-up & restore solutions: veeam*

what is for?

(general description)

Data Life Saviour solution uses our solid expertise and previous large scale project experience to put these great features at work for you:

• **High-Speed Recovery**, rapid recovery of what you want, the way you want it

• Veeam Availability Suite helps you **quickly recover the data you need to enable RTOs of <15 minutes** with tools like Instant VM Recovery®, Veeam Explorer™ for Microsoft Exchange, Active Directory, SharePoint, and SQL Server, Veeam Explorer for Oracle - and more!

• **Data Loss Avoidance**

• **Low RPOs and streamlined disaster recovery** with features like **2-in-1**: backup and replication™, Built-in WAN acceleration, Backup from Storage Snapshots for HPE, NetApp, EMC, Nimble Storage, and Cisco, Veeam Cloud Connect, Scale-out Backup Repository™, EMC Data Domain Boost and HPE StoreOnce Catalyst integration, native tape support and more, you can avoid data loss and achieve RPOs of <15 minutes.

• **Verified Recoverability**: Guaranteed recovery of every file, application or virtual server, every time. With SureBackup® and SureReplica, you can be certain your files, applications, and virtual servers can be reliably restored when needed, and ensure business resiliency through automated backup and disaster recovery (DR) testing.

• **Leveraged Data**: Using backup data and storage snapshots to create an exact copy of your production environment. Enjoy low-risk deployment with Virtual Lab, allowing you to test changes in a production-like environment before actually deploying them.

• **Complete Visibility**. Proactive monitoring and alerting of issues before operational impact. Veeam Availability Suite provides monitoring and alerting tools so that you can discover, and be alerted of, issues in your IT environment before they have a significant impact. It gives you complete visibility of your Veeam backup, VMware vSphere and Microsoft Hyper-V infrastructures.
